Blog API   SOSH

A simple RESTful API for creating, updating, and deleting blog posts built using **Node.js and MongoDB.**

Getting Started

These instructions will get you a copy of the project up and running on your local machine for development and testing purposes.

Prerequisites

You will need to have the following software installed on your machine:

- Node.js
- MongoDB

Installing

Follow these steps to set up the project on your local machine:

Clone the project repository to your local machine:
git clone https://github.com/AtharvaT02/SOSH-BLOG-POST.git

Start Project in Dev mode:
npm run startDev

Run Test Cases(Will work only once because I have manually put the id of blog):
npm run startTest

Routes

The API has the following routes:

- POST /api/blog/create: Route for creating a new blog post.
- PUT /api/blog/update/:id: Route for updating an existing blog post.
- DELETE /api/blog/delete/:id: Route for deleting an existing blog post.

It has a few more routes to create users, login users, find blogs etc.
